Choosing the Right Gas Furnace

Designed for ultimate durability and comfort, Grandaire gas furnaces are available in a variety of AFUE efficiencies.

Durability & Dependability

We are committed to delivering products that provide long-lasting comfort and efficiency. All Grandaire products must pass rigorous 100% run testing to be cleared for shipment out of the factory.

The Industry's Best Warranty

Every Grandaire furnace is covered by a 10 year parts and a 20 year heat exchanger warranty*. Also included is a Unit Replacement Warranty†, which provides a replacement unit if the heat exchanger should fail within the first year.

*10 year warranty requires timely registration and applies to the original homeowner. Visit grandaireac.com for complete details.

† See published warranty at grandaireac.com.

Exclusive Warranty | Quality | Comfort

WFSR 95% AFUE

- 4-way multi-position configuration
 - Hot Surface Ignition (HSI)
 - Standard PSC motor
 - Heating efficiency of 95.5 AFUE
- California NOx approved

WFSR
95.5% AFUE

WFAR 92% AFUE

- 4-way multi-position configuration
 - Hot Surface Ignition (HSI)
 - Standard PSC motor
 - Heating efficiency of 92 AFUE
- California NOx approved

WFAR
92.1% AFUE

WFMR/WFML 80% AFUE

- 4-way multi-position configuration
- Electronic Control Center
- Hot Surface Ignition (HSI)
- Standard PSC motor

WFML is an approved Low NOx California model

WFM(R,L)
80% AFUE

What does AFUE mean?

Similar to the efficiency measure of miles per gallon (mpg) in a car, Annual Fuel Utilization Efficiency, or AFUE, is the measure of a gas furnace's efficiency in converting fuel to energy. The higher the AFUE rating, the higher the energy efficiency.

Higher AFUE Equals Greater Energy Savings
